Courses

- English

SKILLS

Java | Oracle | C# | Postgresql | Spring | JSF | Html | Css | Mysql | Mssql | Angular | Restful | OOP | Git | Svn | JavaScript | Php | Web-Service | Jira | Hibernate | Linux

PERSONAL PROJECTS

First Step to the World of Professional Software Project (05/2015 – 06/2015)

- Within the scope of the First Step to the Professional Software World program organized by Empathic Human Resources, I took part in the .NET project team, where the studies were carried out at Excedra Company located at Yıldız Technical University Technopark.

Restaurant automation (03/2015 – 05/2015)

- I developed the project in C #. I used Telerik for interface design. You can review the project from this link. http://www.yazilimgelistiricileri.com/c-lokanta-otomasyonu/

Online Food Ordering System (10/2014 – 02/2015)

- I have used Asp.Net in the project. There are three user login type(Administrator, Restaurant, Member), the difference from the other systems of the project is that it is location based. The system locates the nearest restaurants based on the person's location and shows its location on the map.

Where Dude (08/2015 – 12/2015)

- I started to design and develop the project while I was participating in Microsoft summer school. At the end of internship, I developed the Universal App application in C#.
